PROFESSIONAL SUMMARY

Azure AI Developer with 3+ years of software development experience, including 3 years working with Microsoft Azure, Generative AI, and enterprise chatbot application. Skilled in designing, developing, and deploying AI-powered conversational solutions using Azure OpenAI Service, Azure AI Search, Python, and REST APIs.

TECHNICAL SKILLS SUMMARY

- **Programming Languages:** Python, JavaScript, TypeScript, SQL
- **Generative AI & LLMs:** Azure OpenAI Service, GPT Models, Generative AI, LLM Integration, Prompt Engineering, Function Calling
- **RAG & Search:** Retrieval-Augmented Generation, Azure AI Search, Vector Search, Semantic Search, Hybrid Search, Embeddings, Document Chunking
- **Azure Cloud Services:** Azure App Service, Azure Functions, Azure Blob Storage, Azure Cosmos DB, Azure SQL Database, Azure API Management, Azure Key Vault
- **Backend Technologies:** Python FastAPI, RESTful APIs, JSON
- **Frontend Technologies:** React.js, HTML5, CSS3, JavaScript
- **Security:** Microsoft Entra ID, OAuth 2.0, Managed Identity, Role-Based Access Control (RBAC)
- **DevOps & Deployment:** Azure DevOps, GitHub Actions, Git, Docker, CI/CD Pipelines
- **Monitoring & Testing:** Azure Monitor, Application Insights, Log Analytics, LLM Evaluation

WORK EXPERIENCE

CLO VIRTUAL FASHION INC.
Azure AI/Generative AI Developer ***June 2022 - Present***

1. **Knowledge-Based AI Chatbot**
   - Designed and developed enterprise-grade AI chatbot using Python**,** Azure OpenAI Service, and Retrieval-Augmented Generation (RAG) to deliver accurate, context-aware responses using enterprise knowledge bases, community forums, and external content sources.
   - Built end-to-end RAG pipelines incorporating document ingestion, text chunking, embedding generation, vector indexing, and semantic retrieval to improve knowledge discovery and response quality.
   - Integrated Azure AI Search with Azure OpenAI to implement vector similarity search, hybrid retrieval, and semantic ranking for efficient retrieval of relevant enterprise information.
   - Developed RESTful APIs using Python FastAPI and interactive React-based chatbot interfaces, enabling seamless communication between users, LLM services, and enterprise backend systems.
   - Automated knowledge base ingestion and document processing using Azure Functions and Zendesk webhooks, enabling continuous updates to searchable enterprise content.
   - Implemented conversation history, contextual memory, and session management using Azure Cosmos DB to support multi-turn interactions and personalized chatbot experiences.

- Applied prompt engineering and LLM evaluation techniques to optimize response accuracy, groundedness, contextual relevance, and consistency while minimizing hallucinations.
- Secured enterprise AI applications using Microsoft Entra ID, Azure Managed Identities, and Azure Key Vault, implementing authentication, authorization, and secure secrets management.

2. **AI Chatbot Admin Dashboard**
   - Designed and developed a React-based admin dashboard to centrally manage AI chatbot configurations, knowledge base content, user access, and application operations.
   - Developed Python FastAPI RESTful endpoints to support dashboard functionality, including administrative operations, data retrieval, and integration with Azure backend services.
   - Implemented role-based access control (RBAC) using Microsoft Entra ID to secure administrative features and restrict access based on user permissions.
   - Integrated Azure Cosmos DB to manage chatbot configurations, conversation records, and administrative data.
   - Built monitoring and reporting features to provide visibility into chatbot usage, conversation activity, and API performance.

3. **Zendesk Knowledge Base Website**
   - Designed and customized Zendesk Guide Help Center templates using HTML, CSS, JavaScript, and Zendesk's Curlybars templating language to deliver a responsive, user-friendly knowledge base website
   - Implemented responsive navigation, search interfaces, and dynamic content presentation to improve knowledge base accessibility and usability.
   - Integrated Zendesk Help Center APIs to retrieve and display knowledge base articles, categories, and sections dynamically.
   - Customized article templates, navigation menus, breadcrumbs, and related-content components to provide a consistent user experience

4. **Company Website Development**
   - Maintained and updated the company’s website using Next.js, focusing on performance optimization, SEO, and responsive design, providing a seamless user experience across devices.

EAGLERIDER
Jr. Associative Project Manager ***August 2017 - 2022***

- **Data Reporting**: Used MySQL to retrieve data and produce over 50 reports using Crystal Reports that is utilized by the accounting and management departments
- **Marketing & Workflow Management**: Designed email layouts with Photoshop and managed HubSpot workflows for marketing campaigns.
- **Website QA**: Tested and debugged the company's website after new releases
- **IT Support**: Provide IT support and fulfill help desk tickets

EDUCATION

UC Santa Cruz **Graduated July 2017**

- Graduated Spring 2017 with B.S Degree in Computer Science. Coursework included analysis of algorithms, creating mobile and web applications, database management and OS programming.
